01

EDUCATION

Bachelor of Technology - BTech

Indian Institute of Information Technology, SriCity

- In Computer Science

Junior High/Intermediate

Narayana Junior College (2021-2023)

02

PROJECTS

Construction Technology (ConTech) Platform

- Developed and deployed "Build and Beyond," a full-stack web platform connecting clients with construction professionals to streamline the hiring process for large-scale projects.
- Engineered a dynamic bidding system allowing professionals to submit competitive proposals on client-posted projects, fostering a transparent marketplace.
- Implemented a secure, end-to-end payment gateway to manage project funds, milestones, and final transactions between clients and contractors.
- Designed a user-centric interface for both clients and professionals to manage project lifecycles, from initial posting and bidding to direct hiring and communication.

Note-Taking App

- Developed a file-based task management web application using Node.js and Express.js to perform CRUD (Create, Read, Update, Delete) operations on text notes.

03

LEADERSHIP EXPERIENCE

Editing Domain Lead | Mis-en-scène Club

- Directed the post-production workflow for all club projects, from initial cut to final export.
- Managed and mentored a team of student editors, providing technical guidance on editing software and creative feedback.
